	B. <i>Copyright Law as it Relates to ISPs</i>	1031
V.	GOOGLE'S MATRIX V. THE COPYRIGHT ACT.....	1034
VI.	CONCLUSION.....	1038

I. INTRODUCTION

Imagine a world ruled by computers, where humans are enslaved in tiny pods and used for their body heat and neural activity. In order to achieve submission, the computers use a giant matrix of images from the year 1999 to keep the humans from resisting their restraint, essentially enslaving their thoughts within the confines of the algorithm. Their memories, mixed with the recurring images, assure them that this false reality is actual reality. Fortunately for mankind, a rebellion has begun—a rogue uprising that will hopefully end the tyrannical reign of this algorithmic computer web, known as The Matrix.
